8. How SirbaoXi Was Launched

The launch of SirbaoXi Coin was the result of a clear roadmap and transparent development:

1. Community Research

A grassroots movement of crypto enthusiasts, developers, and investors collaborated to assess the market gaps and needs.

2. Whitepaper & Planning

Over two months of strategic planning went into creating this whitepaper, outlining goals, tokenomics, and growth.

3. Smart Contract Development

The SBX smart contract was coded and tested on testnets. It was later audited for safety and optimized for gas efficiency.

4. Website & Community Launch

The official SirbaoXi website launched with a focus on education, transparency, and early adopter

access.

5. Airdrops & Pre-sale

Initial users and supporters received airdrops, and a public pre-sale was opened to early investors.

6. Liquidity & Listing

Funds from the pre-sale were used to add liquidity to PancakeSwap. The liquidity was locked for 12 months to ensure investor trust.

7. Continuous Development

The SirbaoXi project continues to evolve with roadmap milestones, community suggestions, and new partnerships.

9. Security & Audits

SirbaoXi adheres to the highest security standards:

- - ☑ Smart contract audit by a third-party security firm.
 - - ☑ Liquidity locked via TrustSwap.
 - - ☑ Community bug bounty program launched.
-

10. Future Developments

-

SBX Wallet App

- Mobile NFT & DApp Access
- SBX Visa/MasterCard Crypto Card
- Cross-chain Integration (Ethereum, Solana)
- Educational Crypto Courses (SirbaoXi Academy)
